

Heartbreak

Love, an age old bond,
product of million of
years of evolution.

Trust, joy, intimacy and
strength are amongst the
tools it provides against
this brutal life.

Love is one unique thing
which stand against
common nature.

All things break more
easily than they re made...

Yet falling in love was the
easiest thing you ever did.

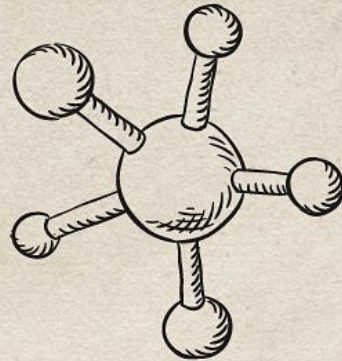

Now when you see it
break, you feel the worst
pain of all pain

Your whole world comes
crashing down. You are in
confusion, anger and longing for
that stability.

Love is much like a dance
with your partner.

It is much like chemical
bonding between atoms.

No mathematics can give
determinate measure of the steps
they will take. Only
probabilities. The bond just
works

You can't predict or force
your partner's moves. But
you trust them just
enough to make your
world harmonious.

Two electrons perform a
graceful dance in their
orbitals, bonding the 2
atoms together.

You put your trust,
strength, care and dreams
into that special someone.

You feel lonely as all your
mental clarity dissipates

One moment, it's hate for
causing you such pain and
seemingly uncaring.
Another moment is those
good memories and how
those were the happiest
moments of your life.

You don't know what to
do. It's the pain of a
heartbreak
